

WORLD HAPPENINGS
BRIEFLY TOLD

The famous international horse show in London, has been abandoned for this year.

A record, probably without parallel in the Dominion, is one told by Guelph, Ontario, where not a single mortality occurred within the city limits during 1923.

Employing 40 men, camp No. 3, owned by P. Bain, logging operator of Dowdell, B.C., has re-opened. The mill and camp closed since November, will be kept for export.

Alexander Bangster, who once lamented a quarter section of land in what is now the heart of Winnipeg, is dead at New Westminster, B.C., aged 80.

W. A. Crawford-Ross of Nanton, Alberta, was re-elected president of the Alberta Herd Breeders' Association at the annual meeting in Calgary at the annual meeting in Calgary.

Major W. H. Gladstone Murray, M.C., prominent official of the British Broadcasting Company, has arrived in Ottawa to begin his temporary duties as advisor to the Canadian Radio Broadcasting Commission.

Construction of a \$72,000 oil refinery in Calgary is planned by Federal Oil Companies Ltd., Harold J. Maloney, chairman of the company's board of trustees states. The plant's capacity would be 250 barrels a day.

Alberta's legislature has adopted a motion presented by Premier J. E. Brownlee, urging the federal government to call as soon as possible a conference to discuss changes in the British North America Act.

England will probably not be represented at the Canadian Bileon on Connaught ranges, Ottawa, this August. Lord Cottesloe, president of the National Rifle Association, was "afraid financial conditions would prevent" the sending of an English team.

Statement Is Denied

Stefansson Says Eyes Do Not Change Color During Arctic Night

Brown eyes do not turn blue during the long nights of the polar region, according to Dr. Vilhjalmur Stefansson, noted Arctic explorer. Science Service quotes him as stating, in a commentary on the statement in another magazine that "after a prolonged absence of sunlight, men on polar expeditions find their eyes, irrespective of previous color, have turned blue."

Dr. Stefansson, in all his long experience in the lands of long nights could not recall having observed this phenomenon. The statement was alleged to have been made by an entry in the Journal of Captain Scott, British explorer who perished after having reached the South Pole. Inquiries addressed to Captain Scott's companions and collaborators not only failed to bring confirmation of this report but brought only statements to the opposite effect. Daring men see the sun return at the end of a polar night with eyes that are still dark.

Halifax Had Freak Winter

Lowest Temperature Recorded Was Seven Degrees Above Zero

Yachting on the harbor was not the only unusual incident of this freak winter in Halifax. For the first time since weather records were first begun in the city, about 60 years ago, the mercury failed to drop to zero during the months of December, January and February.

Mean temperature during February was 20.3 degrees, or nearly 23 degrees higher than the mean mark of 23.9 established during the last 29 years, according to figures compiled by Frederick R. Roman-Dan meteorologist here.

The coldest day of the winter was Feb. 11, when the temperature was seven degrees above zero.

Absence of snow was another unusual feature of the winter. For instance, the total of snow and rain combined in February was 5.31 inches. During the same month last year the total was 17 inches.

U.S. Leads In Apple Production

Apple orchards of the world are estimated at 7,100,000 acres, with a yearly production of 550,000,000 bushels. Canada supplies only 2.4 per cent. of the total, the United States being in the lead with 35 per cent.

Shadblow trees have three distinct leaf forms and all three may often be found on the same twig.

W. N. U. 1923

Expensive Economy

Skipping On Advertising Has Always

Always Been Poor Business

Henry C. Lytton, a veteran Chicago merchant, is quoted as observing that 1923 is of all years a year in which business men should make full use of advertising. And he speaks of what he knows.

Forty-six years ago, Mr. Lytton launched his business. He had, as he points out, just \$12,000 capital, but he did not hesitate to spend between \$2,000 and \$4,000 of it on newspaper advertising before he even opened his doors.

His business recently was valued at approximately \$7,000,000.

As a testimonial to the work that a wise advertising program can do for a business, his experience speaks volumes. Skipping on the advertising appropriation can be false economy of the most expensive kind.

Japan Buys Canadian Nickel

To Be Used In Mining New Small

Cobalt

The finance ministry recently bought from the International Nickel Company of Canada several hundred tons of nickel for the purpose of mining new small cobalt to replace the present five and ten-cent pieces of nickel and copper alloy. The sale is 1,100 of the yen, which is equivalent to about 22 cents.

Officials of the finance and war ministries denied any knowledge of a plan to convert the present coins into bullion.

Broadcasting Not New

Had Its Origin In Halifax Over

Thirty Years Ago

If you think broadcasting is something new, read this from the Halifax Herald: "Broadcasting, considered new within the last few years, had its origin in Halifax over thirty years ago, when the unusual experiment was made in the old academy of music. The Baker Opera Company was playing there. Creighton Mitchell, now of Wolfville, then an employee of the Nova Scotia Telephone Company, rigged a large funnel over the stage, placed a telephone microphone in the mouth of the funnel, and carried the program over telephone wires to the telephone company building, where it was enjoyed by all the staff."

Managing a Crowd

England's Police Know How To Quell

Disorder Without Violence

Over in England as we have repeatedly pointed out, the policeman carries no fire-arms, but only the policeman's baton. Yet when great crowds of over a hundred thousand assembled in London, and there was disorder and some violence, it was reduced to order and not a shot was fired and not a man was killed. There was no machine-gun, there was no parade of revolvers, there were no sawed off shot-guns, and nobody's blood ran at any man's door. England can still show us something in the management of crowds and in the care of human life—Halifax Chronicle.

Much Gold Hoarded

More than \$1,000,000,000 in gold has been hoarded throughout the world in the last eighteen months. League gold experts estimated. Every month, League statisticians report, several million more dollars in gold is disappeared from world circulation. The hoarding movement started late in 1921, soon after England went off the gold standard.

Some people recommend brandy for seasickness, but the sure cure is port.

Sweden has increased its appropriation for the electrification of State Railways.

BRITAIN'S ABSENT-MINDED PASSENGERS

It is hard to believe, but these umbrellas are just a few of the vast number of articles left by forgetful travellers in the Mother Country in trains and stations. These unclaimed articles, ranging from smoking pipes to spades in half-dozen lots, are sold at regular periods by the British railway companies.

Makes Dramatic Story

American Money Helped King of

Greece To Escape

His Majesty George of Greece has the upright carriage, the high, bold forehead, and the unaffected bearing of his father, the late King Constantine. Although not well off, he probably prefers his present mode of life to the disturbed existence which ended in his banishment nearly 11 years ago. He reigned for only 18 months, and during that time tension between Greece and Italy was at its height. It was broken by Mussolini's famous bombardment of Corfu, which resulted in the proclamation of a republic. How the King and Queen escaped from the royal palace on that occasion makes a dramatic story. Some months previously Mrs. Gary, wife of Judge Gary, the American millionaire, was entertained by the Queen in the hot season, and was surprised to find the palace swimming with them. She promised to send the Queen some anti-fly curtains from America, but finding it difficult to get them through, sent a cheque for 5,000 dollars instead, so that the curtains could be bought in Europe. The money arrived in Athens before the revolution, and it was only by its aid that the King and Queen were able to bribe their way out of the country.

Recipes For This Week

(By Betty Barclay)

CHOCOLATE JUNKET WITH

CHOPPED NUTS AND

WHIPPED CREAM

4 tablespoons powder for orange

junket.

1 pint milk, the cream of which

is cup whipping cream.

1/2 cup sugar.

Chopped walnuts.

Green maraschino cherries.

Make chocolate junket according to

directions on package. Chill in refrigerator.

When ready to serve, whip cream and add sugar, mixing well.

Place on dishes of junket, and sprinkle

chopped nuts and fruit. A green

maraschino cherry adds color to the

topping.

CAROLINE FRITTERS

To three-fourths cup canned corn, add one-half cup milk, two well-beaten eggs, and one-half tablespoon sugar. Mix thoroughly. Mix one scant

cup flour, one tablespoon baking powder and one-half teaspoon salt. Stir

and combine with the other mixture.

Place buttered muffin rings in a buttered

dripping pan. Drop the combined

mixture into the rings, and bake in a moderate oven.

Left Large Estate

Field Marshal Sir William Robertson, who died Feb. 12, left an estate of £49,000, about \$200,000 at present rate of exchange. Noted in the list of bequests were gifts of all his awards and medals and decorations to his son for life. On his son's records these are the follow the baronetcy.

Canadian Pans Poultry

The total value of all descriptions of farm poultry in Canada in 1922 is officially estimated at \$34,738,000 as compared with \$43,138,000 in the previous year.

SUNDAY SCHOOL LESSON

APRIL 9

JESUS' REVERENT CONFESSION

AND LOYALTY

Golden Text: "If any man would

come after Me, let him deny himself,

and take up his cross, and follow

Me."—Mark 8:34.

Devotional Reading: Romans 8:31-39.

Explanations and Comments

Cross-Bearing the Duty of All

learned to regard Him as the Messiah;

it was as much as they ever

could learn till the further lesson was

brought home to them in practical

form by the cross. There was no compromise

for privacy; Jesus could start on

that last journey to Jerusalem which

was to end on Calvary. The first sign

of this is the deliberate change in

His methods. It is hardly possible that

the next step was taken without an

interval. Jesus was alone with His

disciples, apparently when a great

confession was made. In the next

breath, Jesus was alone with the

crowd. But the proximity of the

two phases is intended to lead the

judge, to imply that the new doctrine

was the direct result of their acceptance

of Him as the Messiah. He is about to go to Jerusalem, and

making a public profession of His

conditions on which He is prepared

to accept, recants. In these

verses Jesus, in His own words, sets

forth the basis of all His

ethics. In fact, there may be said to

be only one rule—that of self-denial.

—R. W. H. Robinson.

"If any man would come after Me,

let him deny himself, and take up his

cross and follow Me." Jesus does not

sell himself, but he means the giving up

of his life, but the giving up of self, the

yielding of one's will to Christ's

will.

For whoever would save his life

shall lose it; this sounds paradoxical,

but it is not. Jesus is speaking of two

things: the natural life and worldly

life, and the life of the spirit. Who

ever shall lose his lower life for

My sake and the gospel's shall save

his life. The saving has been

paraphrased thus: "Whoever shall

make his life his business to save or

lose his natural life and worldly

well-being, shall lose the higher life,

the life of the spirit. And whoever

willing to lose his natural life for My

sake, shall find the true eternal life."

Wins U.S. Science Prize

Young Canadian Awarded \$1,000 By

American Chemical Society

Frank H. Spedding, Ph.D., a 30-

year-old scientist, and a native of

Hamilton, Ont., who has fashioned a

new method of seeing into the invis-

ible fine structure of solid matter, was

awarded the youthful grand prize of

\$1,000 by the American Chemical

Society.

Dr. Spedding uses the light which

can be reflected or refracted by

solids, such as rocks and minerals,

to reveal what scientists call their

fine structure. This is the study of

spacing of atoms in the solid. In

spinning and other antics of these

tiny particles. He reads the

messages of their light and

they have been passed through a

spectroscope, a glass prism which

breaks them into the rainbow and

records them as vertical lines on a

photographic plate.

—Haltimere Sun.

Restrictions Attached

U.S. Secretary Of Treasury Barred

From Opening U. S. Bank

When Ogden U. Mills returns from

the office of Secretary of the Treasury

he will be free to work wherever

he pleases except in a bank that is a

member of the Federal Reserve Sys-

tem. The system includes all national

banks and most of the state banks

that might like to seek the services

of a member Secretary of the Treasury;

the Federal Reserve Act of 1913

provides that "the Secretary of the

Treasury and the Comptroller of the

Currency shall be ineligible during

the time they are in office and for

two years thereafter to hold any of-

fice, position or employment in any

member bank. Appointive members

of the Federal Reserve Board simi-

larly are restricted unless they finish

the term for which they are appoint-

ed.—Haltimere Sun.

Would Be Welcomed

"Down with Lipping" is to be the

slogan of an association of writers,

artists and publishers being formed

in Paris. The object of the association

is to enforce the abolition of tips in

all circumstances and to replace them

by salaries paid by the employer or

WORLD ECONOMIC CONFERENCE MAY SOON BE HELD

London, Eng.—Aspects of a "new deal" for the world became evident here in conferences between Prime Minister Ramsay MacDonald and Norman H. Davis, United States ambassador-at-large.

They have as their objective convening a world economic conference as soon as possible and breaking the stronghold which is suffocating world trade.

Both agree the sooner the conference is held, the better. They proceeded with a preliminary exchange of views, the first of which was a decision that only six weeks' notice need be given the participating nations, instead of three months, making the beginning of the conference possible for late in May.

Their talks were confined to the economic conference, disarmament and debts were not discussed.

Mr. Davis said the conference does not depend on settlement of either debts or disarmament, and he would not discuss the British debt payment due the United States on June 15. He stated, however, that the new congress was largely elected on the understanding that there would be no cancellation, reduction or postponement of the war debt.

He is proceeding on the assumption the economic conference will be held in London, and does not know whether a preliminary British mission, possibly headed by Mr. MacDonald, will go Washington.

Study Authority Given Parliament At Ottawa

Law Officers Looking Into New Rights Under Statute Of Westminster

Ottawa, Ont.—Law officers of the crown are studying the new authority given to the Canadian parliament as a consequence of the statute of Westminster. Hon. Hugh Guthrie, Minister of Justice, told the House of Commons. It was expected a bill with a number of clauses embodying the territorial and other rights given to parliament would be brought down this session. In the measure would probably be included a provision authorizing appeals to the judicial committee of the privy council in England in criminal cases.

Quits Germany

Prof. Einstein Takes Steps To Renounce Prussian Citizenship

Berlin, Germany.—As direct-action representative measures by Chancellor Adolf Hitler's Nazis got under way against Jews in many parts of Germany as a prelude to the nation-wide anti-Semitic boycott, it was learned Prof. Albert Einstein has taken steps to renounce his Prussian citizenship. Prof. Einstein, a Jew, became a citizen in 1914 when he accepted a position with the Prussian Academy of Sciences. Upon landing at Brussels after his recent trip to the United States, he wrote to the German consulate there for information about the steps necessary to end his citizenship. He pointed out he formerly was Swiss.

Anti-German Boycott

Reaction In France Regarding Anti-Semitic Demonstrations

Paris, France.—The start of a French anti-German boycott appeared with some merchants displaying signs saying "German salesmen will not be received." French Jews were organizing mass meetings in protest against alleged anti-Semitic incidents in Germany.

The feeling in France was indicated when an audience in Marseilles ceased a manifestation of hostility toward Emil Ludwig, the noted biographer, after the chairman of the meeting declared Ludwig was an exile from Germany. The audience had protested violently because of the author's criticism of military features of the Versailles peace treaty.

Left \$50,000 Estate

Ottawa, Ont.—An estate valued at \$50,000 was disposed of under the will of Rt. Hon. F. A. Anglin, former chief justice of Canada, entered for probate here. Consisting of \$28,000 insurance and the balance chiefly in real estate, it is left to his widow. He bequeathed the remainder to his five children.

Resentment In Russia

Soviets Object To Attitude Of Britain In Sabotage Charges

Moscow, Russia.—Foreign Minister Litvinov has intentionally accused the United Kingdom of attempting "harsh diplomatic pressure" in connection with British subjects arrested in sabotage charges involving the operations of the British-Metropolitan Vickers Electrical Company, an official communiqué revealed.

The communiqué told of a call made by Sir Edmund Ovey, the British ambassador, at the foreign office yesterday "to acquaint the foreign minister with steps the British government intends to take if the Soviet Government places on trial several British subjects charged with sabotage."

Mr. Litvinov did not wait for the ambassador to explain the measures contemplated, the communiqué said. Instead he told the ambassador that the government's decision to try the case cannot be changed, and if the British government intends to influence this decision by informing us of its intended measures, then the ambassador must be assured that nothing will come of it.

The foreign minister remarked that "matters such as attempted harsh diplomatic pressure from the outside might be successful in Mexico, but it is the Union of the Soviet Socialist Republics are doomed to failure before."

Sir Edmund formerly served as Britain's diplomatic representative at Moscow.

After the foreign minister had made his remarks, the communiqué said, Sir Edmund said he was not going to explain the British measures.

It is understood the action contemplated by the British government consisted of an embargo against Soviet goods.

Guarding Airplane Wreck

Armed Police Protect Remains Of Imperial Airways Plane

London, Eng.—Britain has been shocked by the air disaster which snuffed out the lives of 15 persons when an Imperial Airways biplane crashed into the sea off the coast of Liverpool. The plane, a "City of Liverpool," when it crashed near Esen, Belgium.

A varied mass of wreckage was still the custodian of 13 of the passengers who had met instant death in the great "plane" caught fire and fell to the earth like a spent rocket. Two more bodies were found in the vicinity but were mutilated beyond recognition. Three victims had evidently attempted to jump free of the plane.

Belgian air industry officials are expected to conduct investigations into the catastrophe. Meanwhile a corps of armed police are on guard around the remains of the once proud "City of Liverpool" which was en route from Cologne, Germany, to Croydon, England, via Brussels, Belgium.

London, Eng.—Officials of the Imperial Airways confessed themselves at a loss to explain the catastrophe involving the crash of their air liner, "City of Liverpool," in Belgium with the loss of 15 lives.

Assist Horse Breeders

Policy Of Government In This Connection To Be Continued

Ottawa, Ont.—The policy of providing assistance to horse breeders' clubs in the prairie provinces is to be continued this year with adjustments to the advantage of the breeders, it was announced by Hon. Robert Weir, Minister of Agriculture.

The date of application is brought forward to June 1, and a promoter to whom the clubs and breeders should apply for information has been appointed in each of the prairie provinces.

The promoters appointed are: Carl Roberts, Osborne, Man.; J. W. Brown, Calgary, Alberta; L. L. Col. H. W. Arnold, Saskatoon, for North Saskatchewan; and Dr. Charles Head, Regina, for South Saskatchewan.

France Lost Business

Paris, France.—France lost 4,000,000 francs in trade with the United States as a result of defaulting on the \$10,000,000 debt installment due last December, former U.S. ambassador Taft told a meeting of business men and others called on behalf of the campaign to pay United States.

Bill Passes Senate

Ottawa, Ont.—The bill authorizing the holding of hospital sweepstakes in Canada has been passed by the senate committee on private bills. The measure was supported by Senator A. D. McNeil (Cons., Vancouver).

SUGGEST SOME CHANGES IN OUR VOTING SYSTEM

Ottawa, Ont.—Radical suggestions for changes in Canada's electoral system were advanced in the senate today coupled with a few caustic remarks on the workings of democracy as at present organized.

As a cure for the present high cost of elections, Senator C. W. Robinson of Montreal, himself a veteran of many electoral battles, suggested total abolition of election booths, elimination of registration and the taking of votes by a house-to-house canvass. In his opinion it would save millions of dollars.

"The opinion of half the electors is not any good anyway," said Senator George Lynch-Staunton of Hamilton, as he agreed with the proposal of abolition of registration which cost more than \$1,000,000 at each election. "Take 100,000 young girls voting," said Senator Lynch-Staunton, "their collective opinion would be of great value to any government, wouldn't it?"

The House of Commons might as well be abolished and the entire cost of elections eliminated, remarked Senator C. E. Tanner of Picton, N.B. The country would not be in its present financial difficulty if there had been no cost of the election. The senate alone had dealt with legislation in the last 10 years.

The discussion took place on Senator W. E. Foster's resolution favoring an inquiry into methods of improving the electoral system. Senator Tanner adjourned the debate and the discussion will continue later in the week.

Sensor Lynch-Staunton thought the machinery of government in Canada was far too cumbersome. There was Dominion, provincial and municipal election. There was no reason, if Dominion candidates were elected every five years, why admen should not also be elected for five years instead of a year. Canada had more governments than any other country and more elections.

Mines May Shut Down

Victoria, B.C.—Advices were received here that the Crown's Nest Pass Coal Company, main operation of the coal mine of Fernie, in northern British Columbia, may cease operation of a population of 5,000 people. The company's labor member from Fernie, has given notice that he will ask the legislature that the mines be turned over to interests which will operate them.

Counterfitters have been flooding Scotland with bogus bank notes.

THE NATIONAL ENTRY WHICH SCORED

Here we see Kellogg's Grand clearing a jump at the National Hunt Club race a week before the Grand National at Aintree. Kellogg's Club provided the surprise of the year by winning the coveted Grand National from a field of famous jumpers.

ENVOY TO MEXICO

Joseph Daniels, war-time Secretary of the Navy under President Wilson, who has been nominated by President Roosevelt as U.S. Ambassador to Mexico. Nominations by the President is tantamount to appointment.

British Officers Kidnapped

Chinese Pirates Seize Four Officers From British Ship

Nanchang, Manchuria.—A group of armed Chinese bandits kidnapped four British officers from the British merchantman, "Nanchang," which was anchored at the Nanchang bar.

The captain of the steamer poured the pirates, frantically wrestling an alarm, but the abductors escaped in their junks in the shallow water.

They had swarmed aboard the steamer from three junks, which opened up heavy fire as they drew alongside. British gunboats began an immediate search for the pirates and their victims. The men abducted are W. E. Margrave, A. D. Blue, F. L. Peers and Charles Johnson.

To Investigate Finances

Federal Government Has Sent Official To Western Provinces

Ottawa, Ont.—Before according to the requests of the western provinces for financial assistance the Bennett Government has decided to carry out an investigation into their affairs. For this purpose, Watson Selzer, federal comptroller of the treasury and assistant deputy minister of finance, left Ottawa, March 28.

Secrecy is being observed with respect to his mission and it is somewhat uncertain if Mr. Selzer will go direct to Victoria and west east, or begin at Winnipeg and west west.

Fire In Dublin

Raze Believed By Authorities To Be Of Incendiary Origin

Dublin, Irish Free State.—Fire, believed by authorities to be of incendiary origin, swept Connolly House, headquarters of the Communist Irish revolutionary workers group, and a block of buildings nearby in Bachelors' Walk.

First estimate said the damage might be enormous. Several stores and other adjoining properties were badly harmed.

The blaze in Bachelors' Walk, which runs off O'Connell street by O'Connell bridge, was under control at midnight.

Many persons were injured in fighting at Connolly House, which is about 100 yards from Bachelors' Walk. Several hundred men stormed the Communist headquarters. They threw stones and broke windows, forced their way through the entrance and seized a red flag, pamphlets and furniture which they threw into the street.

The flag and the pamphlets were burned in a demonstration outside the building.

Police repeatedly charged into the crowds, but the disturbance lasted long past midnight.

Connolly House was attacked by hundreds of young men Sunday and Monday nights in the course of Communist meetings.

Thousands of people watched firemen fighting tonight's blaze which was said to be one of the biggest and most dangerous Dublin ever experienced.

Appointment Confirmed

Colonel Taylor, Manitoba Leader Of Conservatives, Receives Judgeship

Ottawa, Ont.—Appointment of Col. J. G. Taylor for many years Conservative leader in Manitoba, as a judge in the court of king's bench in that province, was officially confirmed with the signing of the order-in-council by the Governor-General.

The appointment is to the vacancy created by resignation of Mr. Justice A. C. Galt, which was recently received. Mr. Justice Galt, who recently celebrated his 65th birthday resigned because of ill-health.

A MEASURE TO CURB ACTIVITIES OF ARMED THUGS

Ottawa, Ont.—The House of Commons moved to clamp down on gun-toting when it considered a bill to impose a five-year maximum penalty for carrying a revolver or sawed-off shotgun without a permit. In addition, the bill would add two years' sentence if any man convicted of hold-up or bank robbery.

Hon. James Macdonald, former Minister of Trade and Commerce, advocated stringent regulations against gun-toting by policemen. "Of late years," he said, "the police have been going to an absurd length in this regard," he said. "In small towns and country districts all through Ontario for the last time in history we have been seeing these provincial police going around with a holster and two exposed guns. There are no criminals in the rural parts of Ontario and the duties of our police do not demand the carrying of concealed or exposed weapons."

Although James S. Woodworth, leader of the Co-Operative Commonwealth Federation, expressed similar thoughts, the House generally did not agree with the former trade minister.

It was reported from all over Canada, the justice minister, that gun-toting was on the increase. Thomas Reid, Lib., New Westminster, said Vancouver had 411 armed hold-ups in the first 11 months of 1932. "and life and limb are not safe. It would be a dauntless crime to leave our police without arms."

The armed thug had no friends in the House. Wilfred Hanbury, Lib., Vancouver-Burrard, said if I had anything to say about it, I would put him in jail for the rest of his life."

Dr. J. P. Hodges, Lib., St. Boniface, asked for separate treatment for carrying a sawed-off shotgun. "That's the kind who mean business and we should have a special clause in the bill for him."

The bill would impose a one to five-year sentence for carrying concealed weapons without a permit. In addition, it would revise former sections of the Criminal Code dealing with permits, for the sale, ownership or carrying of weapons and would increase penalties.

BRITISH ENVOY IS RECALLED FROM RUSSIA

London, Eng.—Sir Edmund Ovey, ambassador at Moscow, has been called home to report in person on the Soviet government's refusal to accept a ban on Russian agents, cancellation of negotiations for a new trade treaty with Russia, and perhaps of a severance of diplomatic relations.

Sir John Simon, foreign secretary, was questioned in the House of Commons but declined to commit himself to any statement.

The six men accused are: Alan Monckhouse, director in Moscow for Metropolitan-Vickers Electrical Co.; Donald Well, W. H. Thornton, W. H. McDonald, John Cusby and another technician named Gregory.

Monckhouse and Nordwell are at liberty.

Moscow, Russia. British embassy announced Ambassador Sir Edmund Ovey had been called to London to report on the arrest of several British subjects employed by the Metropolitan-Vickers Electrical Co. in Moscow.

It was said on excellent authority he is not likely to come back, and this probably will add to the complications which began with raids on the company's offices and the filing of sabotage charges against several technicians.

Virtually the entire diplomatic corps was present to see off Sir Edmund and his family when they took a train for Berlin, but the foreign office was not represented.

Old Age Pensions

Alberta Will Not Believe Municipalities From Paying Share Of Cost

Calgary, Alberta.—There will be no return to municipalities regarding old age pension payments, Premier J. B. Brownlee, of Alberta, has informed Mayor Andy Buchanan, of Calgary, who asked the government to relieve the city of the 10 per cent. payment of the pensions.

Mayor Buchanan told the stand the municipalities should be relieved of their share in the pension costs now that the Dominion Government had assumed 75 per cent. of the cost, leaving the provincial governments to pay only 15 per cent. He thought the provincial government should take over the municipalities' 10 per cent. share.

May Spread Tax Payment

Proposed Bill Would Further Relieve Debtors In Alberta

Edmonton, Alberta.—Designed to further relieve Alberta debtors by spreading payment of tax arrears over a six-year period, a bill will be introduced in the Alberta legislature shortly. The bill provides for the consolidation of payment of all instalments of certain local taxes.

The Alberta bill provides that when a taxpayer is in arrears for more than one year in respect of land taxes due the municipality, or for school taxes, he may enter into a consolidation agreement whereby the arrears would be paid by instalments over a period of six years.

Favors The Dole

Direct Relief The Most Economical Plan, Says Senator

Ottawa, Ont.—Cost of providing food for the unemployed in the first 11 months of 1932 "and life and limb are not safe. It would be a dauntless crime to leave our police without arms."

The armed thug had no friends in the House. Wilfred Hanbury, Lib., Vancouver-Burrard, said if I had anything to say about it, I would put him in jail for the rest of his life."

Dr. J. P. Hodges, Lib., St. Boniface, asked for separate treatment for carrying a sawed-off shotgun. "That's the kind who mean business and we should have a special clause in the bill for him."

The bill would impose a one to five-year sentence for carrying concealed weapons without a permit. In addition, it would revise former sections of the Criminal Code dealing with permits, for the sale, ownership or carrying of weapons and would increase penalties.

Soviets Deny Reports

Moscow, Russia.—Although there has been a serious food shortage for some time, the Soviet government in Russia, official quarters vigorously denied Thursday reports published abroad that the nation is suffering from famine. A statement that the country was dying of starvation was branded as "nonsensical."

Canada's Pole Timber Supply

Selecting Suitable Species To Meet Steady Demand From Communication Companies

The steady demand for all classes of wooden poles for telegraph and telephone line construction by Canadian companies has provided problems the solution of which has been the important tasks of the Forest Products Laboratories of the Forest Service, Department of the Interior. To meet the end of the last decade, the pole requirements of communication companies in Canada were limited principally to those timbers having decay-resisting properties. Eastern red cedar was used for nearly all poles in Eastern Canada and western red cedar in Western Canada.

As the available supply of this class of timber in Eastern Canada appeared to be inadequate to meet the demand for poles, and as the heavier poles on poles required greater strength, it was of the utmost importance that an additional Canadian source of pole timber be developed.

The preservative treatment in pole sizes and the investigation of this phase of the problem was undertaken by the Forest Products Laboratories, with satisfactory results. Treated red pine and jack pine poles are now being used in Eastern Canada and treated lodgepole pine and Douglas fir as well as western red cedar poles in Western Canada.

Canada can now supply telephone and telegraph poles to meet any reasonable requirement or specification. Large quantities of western red cedar and a certain amount of treated Douglas fir poles are exported to the United States but so far Canada has not enjoyed any appreciable proportion of the United Kingdom trade, the bulk of the British pole requirements being supplied by Baltic countries. However it is expected that as the British market obtains a better knowledge of the qualities of Canadian poles, a new market for these products will be opened in the United Kingdom.

The use of the heavier pole woods such as red pine, jack pine, lodgepole pine, and Douglas fir has long passed the experimental stage. The preservative treatment on full-sized poles have been carried out by the Forest Products Laboratories of the Forest Service, Department of the Interior, on all recognized pole species and data regarding these and the preservative treatment of pole species is available in the Laboratory and from the records of crosscutting and public utility companies throughout the Dominion.

Destiny Is Known

British Empire Always Follows a Well Charted Course

Hon. G. Howard Ferguson, Canadian High Commissioner in London, contributes an article of encouragement to "The Sailor," the official organ of the Navy League of Canada, having referred to the patriotic work of this League and other similar organizations in Canada, to the broader questions of Imperial economic affairs, and to the turmoil in most other countries of the world. Mr. Ferguson says: "The Empire ship is experiencing difficult weather, but the compass is the best that experienced political seamanship developed in the course of her life has been well and truly charted. Minor diversion from the route there may be, but very strange in this the same mental condition obtained toward the end of every depression in a hundred years of business and the most recent history. The darkest hour precedes dawn—this is as true in business as in relation to solar phenomena. The hopeful thought about it all is that this state of thought invariably precedes the sunshine of better things—Argosy, San Francisco.

Decreased Liquor Sales

NOVA SCOTIA. Consuming Twenty-Five Per Cent Less Liquor

Decrease in almost 25 per cent in volume of liquor through the Nova Scotia Liquor Commission during the last fiscal year is shown in the commission's annual report.

Total sales of liquor dropped by \$1,161,123 during the year ending March 31, 1932. This figure represents a decrease of 23.7 per cent over the period from October 1, 1931, to September 30, 1932.

The Royal yacht, "Victoria and Albert" is the largest yacht in the world; it is the third vessel to bear that name.

W. N. H. 1932

CANADA OCCUPIES PROMINENT CORNER IN BRITISH INDUSTRIES FAIR

Our picture shows the Canadian exhibit in the Empire Marketing Board section of the British Industries Fair in London, England. Canada had two exhibits at the Fair but the one above was sponsored by the Marketing Board, whose duty it is to boost Empire products in the British Isles.

Re-Establishing Elk in Ontario

Fifty Animals From Buffalo National Park Will Be Flashed On Barwash Industrial Farm Lands

Canada's leadership in wild life conservation, as witnessed by success in the restoring of the bison, the protection of the antelope, and the propagation of the elk (wapiti), is widely recognized and the recent excursions in the re-establishing of the elk in Ontario have attracted widespread attention. The Government of Ontario last fall established a herd of twenty-five elk in a selected area in the Pembroke-Crowe Game Reserve near Petawawa. These animals were supplied by the National Parks Service of the Department of the Interior from the herd of close to 1,000 in Buffalo National Park, near Watkinsville, Alberta. The success of last year's experiment led to the proposal to establish another herd on the lands of the Barwash Industrial Farm, twenty miles east of Sudbury, Ontario. At the request of the Ontario Fish and Game Department, the Department of the Interior is supplying two carloads of these animals, fifty head in all. The capture of this herd is now in progress at Buffalo National Park and the animals will be shipped east as soon as it is completed.

The shipment last autumn of elk for Petawawa left Watkinsville, Alberta, on the morning of November 8, and arrived at its destination on November 13, in excellent condition. The twenty-five head were shipped loose in the car under the care of an experienced park warden, who accompanied the animals and saw that they were fed and watered at proper intervals on route. The animals suffered no discomfort during their five-day journey and arrived safely. The animals will be housed in the old barracks on the outskirts of the city. It will have cells for isolating remand prisoners or those awaiting trial and for keeping their preliminary examinations secret from other prisoners, not easy in the old prison called Rogers' Old Queen of Hearts, situated on Tiber's banks on the site of a monastery from which it took its name.

Judge—You, a respectable young man, state a coat? In consequence you have lost your post, and you brought trouble and sorrow to your parents.

Accused—Yes, and it was too tight.

The Darkest Hour

Gloom Of Depression May Soon Be Swept Away

Toward the end of every business depression in history, an exceedingly depressed psychology has always developed. There is nothing new or strange in this; the same mental condition obtained toward the end of every depression in a hundred years of business and the most recent history. The darkest hour precedes dawn—this is as true in business as in relation to solar phenomena. The hopeful thought about it all is that this state of thought invariably precedes the sunshine of better things—Argosy, San Francisco.

Canadian Tobacco Features

The outstanding feature of the tobacco-growing industry in Canada continues to be the growing importance of the bright flue-cured type, says the "Economic Annalist," published by the Dominion Department of Agriculture. Production of this type has risen from 83, million pounds in 1928 to 27, million pounds in 1932.

The chukidar is so much at home hanging upside down as it is in a upright position.

For Freight Rate Adjustment

Rate On Butter Shipments Is Proposed At Regina

Protests of discrimination between freight rates on butter in effect in North Dakota and those effective in Saskatchewan were lodged before the board of railway commissioners at Regina.

An application was made by the Saskatchewan Co-operative Creameries for a reduced scale of freight rates. This application was supported by the associations of the Saskatchewan Government, placed before the board by George H. Smith, traffic and freight rates expert.

No decision was given and permission was granted to the railways to submit written argument, on the condition that a copy of their submissions be sent to Mr. Smith.

Briefly, the application asks for:

1. The establishment of fair and equitable rates from Saskatchewan shipping points to eastern Canada on all butter shipments from Saskatchewan.

2. The inauguration of a similar rate policy on Saskatchewan butter shipments as the Soo Line, Great Northern and Northern Pacific Railways have adopted on butter shipments from Minnesota and North Dakota creameries, which provides for a special commodity rate from butter producing stations to final marketing points.

Jail To Cost Million

New Prison At Home Is Strictly Modern

At the cost of \$1,000,000, Home Is to have a new prison, with every modern improvement, including steam heat and well lighted workshops. It will be built near the old Breaux Fort on the outskirts of the city. It will have cells for isolating remand prisoners or those awaiting trial and for keeping their preliminary examinations secret from other prisoners, not easy in the old prison called Rogers' Old Queen of Hearts, situated on Tiber's banks on the site of a monastery from which it took its name.

Judge—You, a respectable young man, state a coat? In consequence you have lost your post, and you brought trouble and sorrow to your parents.

Accused—Yes, and it was too tight.

July, 1931, is the time set for the opening of the \$20,000,000 Mersey tunnel in England.

Way Down East

"Have you ever seen my play, 'Arms and the Man'?"

MARI: "Have I? Why, I'm producing it down here for a long run—'Til send you a complimentary ticket!"

(Bernard Shaw passed through China recently on a world tour.)—Shrew in the Daily Express.

Had Record As Horseman

John Wesley the Evangelist Travelled As Equestrian of Miles In Saddle

Quite common, but the statute recently unveiled at Bristol to the Rev. John Wesley, may be unique in that the evangelist is shown on horseback. It was at Bristol, when 33 years of age, that John Wesley preached his open-air address and from there he set out on horseback to carry his message to the people of England. John Wesley, if not the first circuit rider, was the greatest of all, because he spent more time in the saddle than any man in the world who has ever been honored with an equestrian statue. His record probably beats that of any cowboy or horseman who ever lived.

In his journey, the other day March, 1770, he states that he had then ridden, "above a hundred thousand miles." He died 21 years later, in March, 1791, aged 58, and he was still riding in his eighties, though later he lost his own chair and horses or the stage coaches.

Of the 225,000 miles he travelled in his 52 years as an itinerant preacher, by far the greater part must have been on horseback. And as to the time he spent in the saddle, it must be remembered that he went at a pace which allowed him to read.

"History, poetry, and philosophy I commonly read on horseback, having other employment at other times," he wrote. And he threw the horse's reins on to its neck while engaged with his books.

Riding with a slack rein saved him from accident, and he observed: "I scarcely ever remember any horse except two that would fall head over heels any way to fall, or make a considerable stumble, while I rode with a slack rein." It will "prevent stumbling, if anything will, but in some horses nothing can."—St. Thomas Times-Journal.

Police Were Good Skaters

During an ice skating tournament in Liverpool, Eng., in London, recently city policemen were skates in order to better control the long lines of spectators. The "Bobbies" were expert skaters and sailed up and down the track with the graceful figures of the Russian ballet. Several British arm and championships were decided at the event.

New Typist (after boss has rattled off list)—I'm sorry, Mr. Tomkinson—what did you say between "Dear Sir" and "Yours Faithfully?"

Money In Turkey

Even with the lower price prevailing in Mantissa realized \$1,277,850 from dressed poultry last season. At \$1.10 each the \$50,000, turkeys brought \$55,000.

The labor movement became a factor in politics in England over a hundred years ago.

Tragedy Of Vanished Race

Many Skeletons Found By Explorers In East Greenland

Victims of a new race of hunters springing up in the icy wastes of East Greenland, where explorers now find the skeletons of humans and bones were found by Captain Mikkelson, who described his voyage of exploration to the Royal Geographical Society in London.

"Almost everywhere along the coast," he said, "we found numerous traces that the land once gave the means of existence for a numerous tribe of Eskimos. But hard times fell on the tribe; it dwindled and disappeared.

"Only once has the Northeast Greenland Eskimo been definitely seen by a European—in 1825, when Clavering found twelve people, who disappeared, frightened by the presence of the white man, and whose descendants have never been seen.

"When one has considered the tragedy of the tribe which has disappeared, one can understand the desire to recreate the human activity which once existed along these barren stretches of coast by creating again the basis of existence for the disappearing Greenlanders, whose only means of livelihood is hunting."

"Once upon a time a large number of Eskimos must have been living in this district. Both in the huts and (especially) in the graves we came across many archaeological finds of importance."

A catastrophe must have overcome the Eskimos, for in several huts we found a number of skeletons, and it seemed that the Eskimos had met with a sudden death.

"We found a rather large Eskimo settlement, very old and entirely in ruins, with a number of graves, meat depots and fox traps. The ruined huts were dug out, and we found a number of implements among the ruins, many of which were well preserved and of archaeological value."

"To judge from the implements, this camp seems to have been inhabited about 1400-1500."

Want Representation

Grain Growers' Association Pass Resolutions At Regina

The Grain Growers' Association of Saskatchewan, organization committee, at a meeting held at Regina, passed a resolution asking that when appointments are made to the debt adjustment committee, the government name at least one representative for agriculture.

Another resolution calls on the provincial government to name two assistants to George Smith, trade and freight commissioner for Saskatchewan, to solicit importations through the port of Churchill, and to increase traffic through that port.

Another request that from the meeting is to be made to the federal government, and those of Manitoba, Saskatchewan and Alberta, lowering of insurance rates for the governments will be asked to request Lloyd's of London to lower their tariffs for insurance of cargoes to and from the port of Churchill.

Another request will be for information to ascertain if the shipping season could be extended.

Escapes Damage

Not Affected By Earthquake

Water Supply System Of Los Angeles Is an interesting fact that disturbances of the earth's crust that occur along the fault which lies on the western coast of the Americas the Los Angeles water supply system appears to escape serious injury. That the system might be seriously damaged by an earthquake is a possibility which occupies a nonvulnerable position in an unstable land is beyond belief; its gifted designers were capable of vision, but not of discounting earthquakes would work havoc. Yet so far its canals and aqueducts have remained intact while other structures have been destroyed.—New York Sun.

Boo—"So your boy was in the army, Mom?"

Mom—"Yassuh, he was on picket duty."

Pick—"Pick duty—what's that?"

Mom—"Well, sah, he worked in the kunnell's kitchen, an' 'ey time de kunnell wanted a chicken mahi mah he had to pick it."

Money In Turkey

Even with the lower price prevailing in Mantissa realized \$1,277,850 from dressed poultry last season. At \$1.10 each the \$50,000, turkeys brought \$55,000.

The labor movement became a factor in politics in England over a hundred years ago.

Gardening Notes

By Gordon Lindsay Smith

In the small garden, vegetables should be limited to those things which lose their freshness quickly after picking and those which are wanted in small quantities often, and usually at the last minute. In the first class, beans, carrots, Swiss chard, celery, stalked tomatoes, cucumbers, beets and rhubarb are suggested. These can all be grown close together, but produce big crops and require a very little attention. Under the heading of freshness, there will be peas and corn. True, they both occupy a lot of room and more than average space will be needed, but neither of them taste the same as when picked within a couple of hours of when served. For handy blanching, of course, lettuce, either head or leaf, and onions both of the green variety from Dutch sets and the other bulbous kind, have places of their own. If grown in the back garden, they will always be there when wanted. To the first two classes of vegetables, in handling vegetables under these or any conditions it is essential that several of the following things be made so that there will be a continuous and fresh supply coming in.

1. The cheapest method of establishing a lawn, and as one has some control over the quality of grass and the freedom from weeds, this is the one to choose. One should spend a week or two in leveling the piece of ground. Dig thoroughly and rake as often as possible, and sow the seed for a week or ten days in order to encourage settling and also to give seeds in the soil a chance to germinate. Sow the seed in rows, and for a week or ten days in order to encourage settling and also to give seeds in the soil a chance to germinate.

2. The most recent seed is the seed that will improve with the years, the best grade of seed obtainable and get it from a reputable seedman. For the most recent seed is the seed that will improve with the years, the best grade of seed obtainable and get it from a reputable seedman.

For the first time in Months trouble was experienced with the electric power in Carbon, when the storm on Monday caused temporary discontinuance of the power and light service in town. Trouble was experienced in one place near the bridge close to the C.P.R. Depot, when the high tension wire snapped and fell into the creek. The repair gang worked on the line and soon had it in shape again.

The picture show had quite a time on Monday night, owing to the power trouble, and after two or three stoppages, the power went off altogether about 10:30 p.m. and the last reel of the picture was not shown.

The Builder's Hardware Store Annual Spring Sale commences on Thursday, April 13th and will continue for ten days. This is your chance to get your share of the savings. See the ad on the front page of this issue.

Tennis commenced to be played at the local courts last week, some of the players report that the ground is firm and ideal for the game.

Mrs. W. Poxon was a Calgary visitor on Wednesday and Thursday.

The Chronicle printed half-sheet posters this week announcing the big Easter Friday dance to be held in the Rockey hall on Friday, April 13th. It is expected some Carbon people will take in the dance.

As Montrealeers Know Him

Featured from Montreal Daily Herald

Beauty is a quarter-back to the stadium, but by a twist of fate, became a railway wreck.

Though he couldn't make the first string on the Varsity gridiron squad, he had to do it. He is probably the shyest man in Carbon.

The likes admire him because he wears his hat over one eye and walks with a quarter-back's swagger. The fact that he is a quarter-back and apparently intends to remain one provides a second element of his sex appeal.

Real men like him because he is a quarter-back to the stadium, but by a twist of fate, became a railway wreck.

The man in the street respects him because he preaches The Gospel of True Christianity.

Politicians know him because he is the boss of the C.P.R. The Prime Minister in another citizen who thinks Beauty is "all right" and his Royal Highness is always ready to prove it by officiating at the launching of a new C.P.R. ship.

Ordinary people respect him highly, and are sorry his railway is having a hard time.

As a youth he wanted to be a judge, but fate intervened and sent him a job in the C.P.R.'s legal department.
